

## + Programming Challenge: Hollow Square

- Write a program that prints the pattern to the right using functions

```
*****  
*           *  
*           *  
*           *  
*           *  
*           *  
*****  
>>> |
```

## + Programming Challenge: Two Dice

- Write a function that simulates the rolling of two dice
- The function should accept a size parameter (i.e. how many sides does each die have)
- The function should return two values which represent the result of each roll
- Extension:
  - Make sure both numbers that you return are different (i.e. you can't roll doubles or snake eyes)
  - Build in an argument that lets you specify whether you want to enforce the no doubles policy
